

fleimio pine cone

Fleimio Pine Cone is a modern wall shelf. It consists of five shelves with unique shapes that dynamically frames the most valuable memories within its appealing form. Designed by Mr Tero Jakku (MA) from Finland.

The Fleimio Pine Cone consists of five metal brackets and five MDF shelves. The both parts are made locally by a Finnish manufacturers and they will be delivered duly packed ready for assembly.

NORDIC LIFESTYLE

The Pine Cone wall shelf is pretty compact in size which makes it suitable for the most valuable things. Good locations are living room, bedrooms, children's bedrooms or kitchens with enough space around it.

DESIGN

Fleimio Pine Cone is designed by Mr Tero Jakku (Master of Arts) from Finland. The Pine Cone's outlook breaks the conventional forms of a wall shelf, therefore, enabling using your own imagination in interior design. It makes new kind of shelf presentations with less possible.

The characteristics of the Pine Cone wall shelf is in its uniquely formed shelves that enable new kind of shelf decorations that catches the eye. For example books will be leaning to the upper shelf. On the other hand in kitchens the Pine Cone looks pretty awesome with for example herbs.

The metal brackets underneath the shelves will be nicely hidden behind the shelves.

DIMENSIONS AND QUALITY

Fleimio Pine Cone wall shelf is made of steel and MDF. Surfaces are painted.

Fleimio Pine Cone's dimensions - when assembled on the wall - are:

SOLUTION FOR MODERN KITCHENS

Old fashioned closed shelves may not be any more very convenient when talking about modern kitchens and food preparation. Instead, an open wall shelf can look good and be really functional in kitchen: enough open space to breath.

As Rosa Herrero wrote 13.1.2014 (Bezzia / Must decorativo: Estantes de cocina que no lo son):

"... If until recently the pristine kitchens with cupboards where to store everything, the opposite is chosen and the wall shelves have become the real kings of the function..... it is a question of turning a simple hole in the wall of our kitchen into an authentic work of art even if it includes pans, drainers and grocers.....
